Call for papers

Special Session: Internet of Things Education (IoT-Edu) at EDUCON 2018

Internet of Things (IoT) is widely considered as the next step towards of the digital society, where objects and people are interconnected and interact through communication networks. IoT not only has a huge social impact, but can also support the employability and boost the competitiveness of companies. It is widely considered as one of the most important key drivers for the implementation of the so-called Industry 4.0 and for the digital transformation of the companies. Relevant impact of this technology is expected in a wide range of sectors.

The rapid diffusion of IoT technologies has created an important educational challenge, namely the need to train a large number of professionals able to design and manage IoT based devices, networks and systems for a large number of different sectors.

The special session "Internet of Things Education" within the EDUCON 2018 Conference focuses on all the educational activities related to IoT, including academic and VET programs, work-based education, virtual and remote labs for didactic porpoises, national and international educational policies and instruments, international projects.

Topics of interest

We welcome submissions from all topics of education applied to Internet of Things, including but not limited to the following:

- VET programs on IoT
- Academic courses on IoT
- Best practices in IoT education
- Remote and virtual labs on IoT
- Work-based learning on IoT
- IoT educational policies at national and international level
- National and international education projects related to IoT
- Training needs of the labour market related to IoT
- Industry-university collaboration on IoT education
- International collaboration in IoT education

Important Dates

We kindly invite authors to submit their full papers for review by 20 November 2017 latest, following the submission guidelines at http://www.educon-conference.org/current/paper_preparation.php.

Program Committee

Chair

Dario Assante, Università Telematica Internazionale Uninettuno, Italy

International Program Committee

Clemente Capasso, Istituto Motori, Consiglio Nazionale delle Ricerche, Italy
Manuel Castro, Universidad Nacional de Educación a Distancia, Spain
Luciano De Propris, Consorzio ELIS, Italy
Hamid Doost Mohammadian, Fachhochschule des Mittelstands, Germany
Marta Flamini, Università Telematica Internazionale Uninettuno, Italy
Stephane Lavirotte, Université Nice Sophia Antipolis, France
Manfred Leisenberg, Fachhochschule des Mittelstands, Germany
Sergio Martin, Universidad Nacional de Educación a Distancia, Spain
Gaëtan Rey, Université Nice Sophia Antipolis, France
Elpidio Romano, Università Telematica Internazionale Uninettuno, Italy
Ottorino Veneri, Istituto Motori, Consiglio Nazionale delle Ricerche, Italy
